## PROJECTS

### **Weather Forecasting App, Python, Jupyter Notebooks**

I developed a weather forecasting app using Python and the Prophet library. This application processes input data from a .csv file and generates accurate forecasts based on the advanced Prophet model. The complete source code and documentation are available for review on my GitHub.

### **Portfolio Website, Next.js, React, TailwindCSS Deployed on Vercel**

Created a portfolio website with the technologies listed. The source code is accessible on Github, and it is visible on "vittoriocompagno.com"

## SKILLS

**Machine Learning** (Python, Pandas, Jupyter Notebooks, Clustering, Markov Chains)

**Object Oriented Programming** (Python, Java, JS, Golang (basics))

**Big Data** (SQL (PL-SQL, PostGre), Basics of AWS, Cloud Computing, Cassandra, Docker)

**Development and Versioning** (Git, VSCode, Debugging, Testing, QA testing)

**Web Development** (HTML, CSS, JavaScript, React, Next.js, TailwindCSS)

**Automation** (Bash, C, Robotics Fundamentals)

## PROFESSIONAL EXPERIENCE

### **GFT Technologies, Developer**

Jun 2022 – present

Milan, Italy

- Expertly designed and executed various ETL pipelines, addressing client needs and boosting their success
- Improved team workflow with effective automation via advanced bash scripting
- Maintained clear communication with stakeholders and clients for smooth application testing and troubleshooting
- Increased application performance by 20% by optimizing processing times
- Encouraged a collaborative and empathetic work environment for team growth and productivity

## EDUCATION

---

**BSc. Computer Engineering, Internet and Cloud Technologies,** Sep 2019 – Oct 2022  
*UniPA* Italy

**ERASMUS Informatik, Universität Salzburg** Sep 2021 – Feb 2022  
Austria

## LANGUAGES

---

**English** (C2), **German** (B1), **Italian** (Native)

## CERTIFICATES

---

EF SET English Certificate (C2 Proficient),  
Google Data Analytics Professional Certificate, Udemy SQL Bootcamp
