Professional Experience

ETL Developer, GFT Technologies   2022/06 – present
                                                                Milan, Italy
- Created and implemented dozens of ETL pipelines to satisfy the needs of our client
- Improved automation for my team's tasks with clever and efficient bash scripting
- Consolidated and cultivated continuous and clear communications with stakeholders and clients to test and troubleshoot applications
- Enhanced application efficiency by 20% by reducing lengthy processing times
- Established a strong team-oriented culture with the people I work with, based on collaboration and empathy

Projects

Machine Learning - Weather Forecasting App

I programmed a Weather forecasting app with Python and the Prophet library. The app takes data from a .csv file and outputs its forecasting based on the Prophet model

Skills

Software

SQL (PL-SQL, PostGreSQL), Python, Machine Learning, Data Analytics in R and Visualisation in Tableau, Java, C, Bash Scripting, Git, MATLAB, Linux, IOT, Docker, DevOps processes, HTML,CSS

Hardware

Embedded Systems, Robotics fundamentals, Circuit Analysis, Signals, PC Hardware, Automated Systems, CPU Architecture

Education

BSc. Computer Engineering, UniPA   2019/09 – 2022/10
                                                                Italy
- 30/30 Databases and Big Data
- 29/30 Java programming
- 28/30 Internet Technologies

BSc. ERASMUS Informatik, Universität Salzburg   2021/09 – 2022/02
                                                                Austria

Certificates

EF SET English Certificate (C2 Proficient)

Google Data Analytics Professional Certificate   **Udemy SQL Bootcamp**

Languages

English (C2)   **German (B1)**   **Italian (Native)**
